Emerging Issues in Asthma Care: Medication Update

The meeting of Resources for Asthma Educators will focus on new medication for asthma management. The session will also include a Reports from the Field session for participants to share challenges and ask questions to the group.

Target Audience
Pediatricians, family practice physicians, nurse practitioners, nurses, school nurses, physician assistants, Certified Asthma Educators, Certified Health Education Specialists (CHES), emergency department staff, medical assistants, respiratory therapists, peer educators, and others interested in asthma care.

Learning Objectives
After this session, participants will be able to:
• Discuss emerging issues in asthma care specific to medications.
• Identify new medications on the market.
• Describe strategies for educating patients about medication use.
• Apply knowledge about asthma medications using case discussion.

Faculty: Deb Chabot, RN, BS, C-AE

Reports from the Field
This workshop will include a Reports from the Field segment where participants share their questions, comments, and experiences with the group. Please be prepared to bring your own to share!
