

# You are the Key to HPV Cancer Prevention

Schedule your “lunch”  
and learn or complete a  
self-study!

**PROGRAM DESCRIPTION:** Low HPV vaccination rates are leaving another generation of boys and girls vulnerable to devastating HPV cancers. Vaccination could prevent most of these cancers. CDC is looking to you to make a strong recommendation for HPV vaccination when kids are 11 and 12 years old. Provided in this presentation is up-to-date information on HPV infection/disease, HPV vaccine, and ways to successfully communicate with patients and their parents about HPV vaccination. Find out how to tell parents that they aren't opening the door to sex—they're closing the door the cancer. Because HPV vaccine IS cancer prevention and YOU are the key.

**OBJECTIVES:** At the conclusion of the 1 hour session, the participant will be able to:

- Define the importance of HPV vaccination for cancer prevention and the rationale for vaccinating at ages 11 or 12.
- List the indications for HPV vaccine for girls and for boys.
- Provide useful and compelling information about HPV vaccine to parents to aid in making the decision to vaccinate.
- Locate resources relevant to current immunization practice.

**TARGET AUDIENCE:** Physicians, nurses, nursing students, medical assistants, pharmacists, and other health professionals who provide immunizations. The target audience also includes health educators, and immunization program managers.

## Join us for a free 1 hour CME Self-Study course
